## Distinctive Attributes of This Machine

- The General automatic tray sealer packaging machine enables the packaging of different foodstuff in plastic and aluminum trays by an automated and continuous process.
- Thanks to the company's advanced technical and engineering expertise, there are no restrictions on tray shape or size. The machine's mould is custom-designed and manufactured based on the customer's tray sample.
- This allows you to focus on improving the visual appeal of your packaging while incorporating creative and innovative concepts.
- This machine supports the usage of different plastic films such as transparent, metallized, and aluminum films, in both plain and printed forms, for packaging solutions.

## MAP Method

This machine enhances product shelf life by utilizing Modified Atmosphere Packaging (MAP), which involves vacuuming and accurately injection of inert gases. With this advanced technology, the shelf life of food products can be extended by 3 to 10 times without the need for chemical preservatives.

## Main Benefits of This Machine

- Reliable, error-free sealing
- Intuitive and user-friendly operation
- Durable and robust construction
- Quick and effortless cleaning
- Low maintenance costs with simple repairs
- Versatile functionality for packaging with different moulds

Accurate packaging with robust sealing and a design that meets industry standards—offering high precision, intelligent function, and enhanced efficiency

Extended product shelf life / Cost-effective performance / Sanitary design  
Exceptionally strong and durable seals / Attractive and precise cutting and sealing results

## Choosing Vormek means:

- Opting for the Leading Brand
- Embracing Technology
- Ensuring Quality
- Fostering Innovation
- Guaranteeing Success
- Implementing Smart Solutions

Key objectives of using machines from Vormek include preserving freshness, extending the shelf life of products, maintaining taste and nutritional value, ensuring sanitary, and preventing spoilage and oxidation.

**Ecovision Vormek**  
Suggest a clear vision for cost-efficiency.

Successfully Achieved CE Certification in the Field of Packaging Machine Manufacturing from Europe

By ISO 9001 Certificate in the field of Packaging Machine Manufacturing

Successfully achieved the CE certificate from Europe in the field of packaging machine manufacturing

## Mould Changing

A standout feature of Vormek's machines is the easy interchangeability of moulds. Operators can quickly replace moulds in under 10 minutes. With just one machine, you can package a variety of products using different moulds.

## Technical Specifications of the General Automatic Tray Sealer

### Packaging Speed

Capable of reaching 7-8 cycles per minute

### Machine Control Panel

User-friendly PLC with a high-quality Delta brand touchscreen display, supporting 4 international languages for easy operation by your local staff.

### Temperature Control System

Features an advanced system for accurate and precise temperature regulation of the machine

### Vacuum Pump

Powerful Vacuum Pump: Equipped with a high-performance vacuum pump, offering a suction capacity of 63 m³

### Dimension of the Machine

Length: 2.5 meters - Height: 1.9 meters - Width: 1 meter

### Electrical Parts

Utilizing qualified and premium brands (Delta, Phoenix, Autronics, Siemens, Moller)

### Mold Dimensions

440 x 300 mm

### Body Material

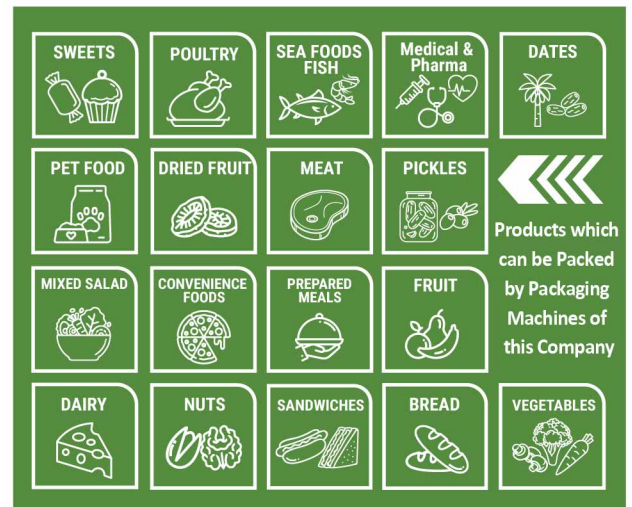

Constructed from high-quality 304 stainless steel

### Electrical Power

3 KW

### Electric Current

7.5 Amp
