

STS008 Semi-Automatic Rotary Table Vacuum Sealing Machine

Ecovision Vormek

Offers a clear approach to cost effective packaging solutions

VORMEK

Innovation based company manufacturer of machinery operating under the brand name Vormek

The most reliable designer and manufacturer in the field of various packaging machines, including Tray Sealer, vacuum chamber, and also the manufacturer of thermoforming packaging machines with high quality and advanced technology.

www.vormek.com / EN-RU-AR-DE

By using this machine:

- The semi-automated Try-Sealer packaging machine, various food products can be
- Beautifully and uniquely packaged into containers with high shelf life by the operator.
- You can use various types of transparent, printed, and metallized plastic films in packaging with this machine.
- This machine is suitable for small-scale factories, workshops, and restaurants.
- With due attention to the company's extensive experience and sufficient technical and engineering knowledge, there are no limitations in choosing the shape and dimensions of containers, and the machine can be designed and manufactured according to the customer's requirements. Additionally, there are no limitations regarding creative ideas and achieving beautiful, unique packaging from the company's packaging machines.

MAP Packaging Technology

Vacuum packaging with modified atmosphere, which involves removing air from the container (vacuum) and injecting gases, along with precise and secure sealing, is one of the features of using this machine. Modified atmosphere packaging (MAP) can increase the shelf life of food products up to 10 times without the need for chemical preservatives.

most important advantages of this machine:

- Strong body and structure
- Easy to use and user-friendly
- Secure and defect-free sealing
- Fast and easy cleaning
- Low maintenance cost and easy repair
- Multi-purpose capability for packaging with various molds

After Sale
Services
10 YEAR

packaging beauty and improvement through Vormek company's machines, compatible with the latest technologies.

Accurate packaging with secure sealing and standard design with smart precision – high efficiency – increased product shelf life – cost-saving – hygienic design – very strong and durable stitching – beautiful cutting and stitching.

Choosing Vormek means:

- Opting for the Leading Brand
- Embracing Technology
- Ensuring Quality
- Fostering Innovation
- Guaranteeing Success
- Implementing Smart Solutions

Key objectives of using machines from Vormek include preserving freshness, extending the shelf life of products, maintaining taste and nutritional value, ensuring sanitary, and preventing spoilage and oxidation

Mould Changing

One of the most important features of the company's devices is the ability to change mould. Changing a device mould can be easily done by an operator in less than 10 minutes. With the purchase of one device, you will be able to package a variety of products using different moulds.

Technical Specifications of the Economic Automatic Tray Sealer Packaging Machine

Packaging Speed

Capable of reaching 7-8 cycles per minute

Machine Control Panel

10-inch touch screen from a premium and high-quality brand Delta, in several international languages

Temperature Control System

Use of PID system for controlling the machine's temperature.

Vacuum Pump

A strong vacuum pump with a suction capacity of 40 cubic meters.

Dimension of the Machine

Length: 1.1 meters - Height: 1 meter - Width: 0.7 meter

Electrical components:

Use of high-quality and premium brands

Mold Dimensions

440 x 340 mm

Body Material

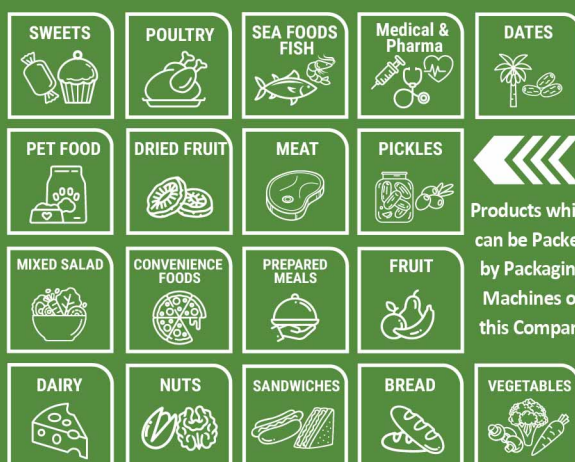

Constructed from high-quality 304 stainless steel

Electrical Power

3 KW

Electric Current

6 Amp
