Special Capabilities of This Machine

The Tabletop manual tray sealer thermal sealing machine is designed for packaging various food items sandwiches, vegetables, fruits, meat, and other perishable foods.

It provides a strong, reliable, and complete seal of the film, preventing the penetration of air, moisture or contamination, while preserving the freshness and quality of the product.

This feature eliminates the main concern of many food producers regarding leakage or accidental tearing.

Easy Temperature Adjustment – Sealing Time Setting

- Equipped with a thermoregulator for temperature adjustment
- Equipped with a timer for setting the sealing time
- Equipped with an alarm

These features provide quick and precise temperature adjustment as well as time control. This capability, without the need for frequent changes, saves time and increases efficiency in packaging operations.

Successfully achieved the CE certificate from Europe in the field of packaging machine manufacturing.

Holds the ISO 9001 Certificate in the Field of Packaging Machinery Manufacturing

Ergonomic and Anti-slip Design

- Smart and ergonomic design to reduce pressure on the operator
- Automatic mechanical pressure application with high precision and no need for human force
- Anti-slip coating even in humid conditions or hand perspiration
- Safe and non-slip grip for full control of the packaging process
- Increased precision and reduced fatigue of the operator during sealing operations

Applications In the Food Industry:

- Restaurants and fast-food outlets
- Customized packaging of fresh food
- Fruit and vegetable stores
- Meat and protein shops
- Pastry and confectionery shops

Most Important Advantages of this Machine:

- Durable body and structure
- Easy to use and operate
- Safe and hygienic
- Reduced labor costs
- Fast and easy cleaning
- Low maintenance cost and easy repairs
- Easy mobility

Choosing Vormek Equals:

- Choosing a Leading Brand
- Choosing Innovation
- Choosing Technology
- Choosing Success
- Choosing Quality
- Choosing Smartness

Aspects such as:

Preserving freshness, increasing product shelf life, maintaining the taste and nutritional value of the product, as well as hygiene and durability, preventing spoilage and oxidation of products, are the main objectives of using this company's machines.

Advantages of Using the Thermal Packaging Tray Sealer

Durable and Strong Structure:

- The body is made of stainless steel
- High resistance against:
 - Corrosion
 - Moisture
 - Frequent washing

Ideal Applications:

- Suitable for continuous and heavy use in professional and semi-industrial environments.
- A reliable option for long-term operations with stable performance.

Products which can be Packed by Packaging Machines of this Company

Technical Specifications of the Tabletop Manual Tray Sealer Packaging Machine

Electrical Parts:

From high-quality brands, with timer and alarm to control the flood time

Packing speed:

Because it is manual, it completely depends on the speed and strength of the operator.

Machine Dimension:

Length: 75 cm
Width: 35 cm
Height: 50 cm

Mold Dimensions:

Length: 290× 220 mm

Body material:

Qualified 304 steel

Film Width:

300 mm

Electric Current:

5 Amp

Electrical power:

500 watts
